- certified
- colour range
- protection
- waterproof
- repositionable
- UV resistant
- tensile strength
- IR process suitable
- writable
- plasticizers resistant
- no noise
- certified
- printed
- waterproof
Sicad Group with its brand Eurocel® has been a pioneer in the development of stationery tapes in Europe. Since 1972, starting from office and stationery supply, Sicad has developed its Adhesive Tapes Experience to becoming one of the world leading company in the manufacturing of a wide range of adhesive tape products. We deliver worldwide from our factories in France, South Africa, Croatia, Brazil and from the HQ in Italy.

Sicad’s knowledge covers all existing coating technologies, our mission is to share with customers our Adhesive Tape Experience.
### PVC 330
Carton sealing and packaging

 Silent unwinding. Available in long rolls for automatic cartons sealing machines and tape printers.

<table>

</tr>
</tbody>
</table>

Metalized
Single sided tape, with BOPP backing, designed to join aluminium pipes in the air conditioning and ventilation sector and for decoration and aesthetic purposes.
reinforcing tapes

FG 10
Reinforcing and bundling

- Filament tape
Single sided tape, medium resistant, longitudinally reinforced, recommended to secure carton boxes or light steel bundles. High adhesion and resistance to break.

<table>
<thead>
<tr>
<th>BACKING</th>
<th>ADHESIVE</th>
<th>COLOUR</th>
<th>TOTAL THICKNESS</th>

</tbody>
</table>

PP 550
thermal exchange and white industry

- Holding tape blue
Medium resistant single sided tape, recommended to secure plastic parts inside refrigerators and freezers during manufacturing and transport. No chemical interaction with application surfaces. Removable without residues. Good resistance to break.

<table>
<thead>
<tr>
<th>BACKING</th>

</tr>
</tbody>
</table>

**General purpose paper tape**

Single sided masking tape for simple and heavy jobs at room temperature. High tack and good adhesion. Remove within 24 hours.

### MSK 6143
**Car refinishing and repairing**

<table>
<thead>
<tr>
<th>BACKING</th>
<th>ADHESIVE</th>
<th>COLOUR</th>
<th>TOTAL THICKNESS</th>
<th>ADHESION</th>
<th>TENSILE STRENGTH</th>
<th>ELONGATION TO BREAK</th>
<th>TEMPERATURE RESISTANCE</th>

<td>4 N/25mm</td>
<td>85 N/25mm</td>
<td>7.5 %</td>
<td>80°C (30 minutes)</td>
</tr>
</tbody>
</table>

**Body shop masking tape**

Masking tape suitable for car repair and painting. Compatible with most common paints and lacquers. Removable without breaking. Temperature resistance up to 80°C (30 min).

### MSK 80
**Car refinishing and repairing**

<table>
<thead>
<tr>
<th>BACKING</th>
<th>ADHESIVE</th>
<th>COLOUR</th>
<th>TOTAL THICKNESS</th>
<th>ADHESION</th>
<th>TENSILE STRENGTH</th>
<th>ELONGATION TO BREAK</th>
<th>TEMPERATURE RESISTANCE</th>

</thead>
<tbody>
<tr>
<td>Saturated paper</td>
<td>Natural rubber</td>
<td>Yellow</td>
<td>0.135 mm</td>
<td>4.5 N/25mm</td>
<td>85 N/25mm</td>
<td>9 %</td>
<td>80°C (30 minutes)</td>
</tr>
</tbody>
</table>

**Professional body shops masking tape**

High performance single sided paper tape in overlapping the tape with masking paper. Resistance to infra red lamps. The yellow colour allows shading, creating a clear contrast with most frequent colours. Resistance up to 80°C (30 min).
### MSK 98
**Car refinishing and repairing**

**Waterproof green masking tape**
Single sided paper tape widely used for car repair applications as well as for wall-painting on building and construction sites and industrial use. Good adhesion on uneven surfaces also. Temperature resistance up to 90°C (30 min).

<table>
<thead>
<tr>
<th>BACKING</th>
<th>ADHESIVE</th>
<th>COLOUR</th>
<th>TOTAL THICKNESS</th>
<th>ADHESION</th>
<th>TENSILE STRENGTH</th>
<th>ELONGATION TO BREAK</th>
<th>TEMPERATURE RESISTANCE</th>

<td>8 %</td>
<td>90 °C (30 minutes)</td>
</tr>
</tbody>
</table>

### MSK 121
**Car refinishing and repairing**

**Waterproof, high temperature masking tape**
Paper single sided tape designed for demanding applications which require high precision, recommended for drying cycles of 100°C. Resistance to IR lamps. The special yellow colour creates a clear contrast marking the edge of the tape. Resistance up to 120°C (30 min).

<table>
<thead>
<tr>
<th>BACKING</th>
<th>ADHESIVE</th>
<th>COLOUR</th>
<th>TOTAL THICKNESS</th>

<td>8 %</td>
<td>120 °C (30 minutes)</td>
</tr>
</tbody>
</table>

### MSK 6085
**Decoration and building**

**External use, 7 days masking tape**
Single sided paper masking tape designed for external use in the building and constructions sectors. Good resistance to outside weather conditions. UV resistance. Recommended to remove within 7 days.

<table>
<thead>
<tr>
<th>BACKING</th>
<th>ADHESIVE</th>
<th>COLOUR</th>
<th>TOTAL THICKNESS</th>

<td>8 %</td>
<td>70 °C (30 minutes)</td>
</tr>
</tbody>
</table>

### MSK 180
**special industrial applications**

**Thermal stability**
Single sided tape designed for powder coating. Resistance to temperature cycles up to 190°C.

<table>
<thead>
<tr>
<th>BACKING</th>
<th>ADHESIVE</th>
<th>COLOUR</th>
<th>TOTAL THICKNESS</th>
<th>ADHESION</th>

</tr>
</tbody>
</table>
**MASKOPRI FILM**
Decoration and building

Ready to use: a transparent HDPE film lined with a special masking tape. The film is electrostatically loaded to stick to whole surfaces. Recommended for big surfaces, like walls, pieces of furniture, doors etc. for professional, industrial and DIY applications. Resistance up to 80°C (30 min). Recommended to remove within 48 hours.

<table>
<thead>
<tr>
<th>BACKING</th>

### 729 GDA
**Flooring and carpet**

- **BACKING**: Synthetic cloth
- **ADHESIVE**: Synthetic rubber
- **COLOUR**: White (brown paper liner)
- **TOTAL THICKNESS**: 0.155 mm
- **ADHESION**
  - Ext: 25 N/25mm
  - Int: 20 N/25mm
  - TENSILE STRENGTH: 67 N/25mm
- **ELONGATION TO BREAK**: 10 %
- **TEMPERATURE RESISTANCE**: 60 °C

**High adhesion**
Standard double sided cloth carpet tape. High adhesion to secure fixing on all types of surfaces. Good tack. High conformability. Easy to tear by hand.

### 730 GDA
**Flooring and carpet**

- **BACKING**: Synthetic cloth
- **ADHESIVE**: Synthetic rubber
- **COLOUR**: White (brown paper liner)
- **TOTAL THICKNESS**: 0.235 mm
- **ADHESION**
  - Ext: 35 N/25mm
  - Int: 27 N/25mm
  - TENSILE STRENGTH: 80 N/25mm
- **ELONGATION TO BREAK**: 15 %
- **TEMPERATURE RESISTANCE**: 60 °C

**High adhesion, all purpose tape**
High performance double sided cloth carpet tape. Very high adhesion to secure fixing on difficult substrates. High tack and adhesion. High conformability. Easy to tear by hand.

### 756 TRANSFER
**Fixing, mounting and fastening**

- **BACKING**: Without backing
- **ADHESIVE**: Acrylic solvent based
- **COLOUR**: Transparent (brown paper liner)
- **TOTAL THICKNESS**: 11 mils
- **ADHESION**
  - Ext: 9.5 N/25mm
  - Int: 9.5 N/25mm
  - TENSILE STRENGTH: \%
- **ELONGATION TO BREAK**: \%
- **TEMPERATURE RESISTANCE**: 80 °C

**Multipurpose, versatile**
Film of adhesive without backing, general purpose, to fix various items in the industry, craft industry, at school and at home. Good adhesion on all substrates (cardboard, paper, leather, fabrics, plastics, wood). Good ageing resistance. Temperature resistance up to 80°C (up to 130°C short period).

### 770 PROFIL
**Car refinishing and repairing**

- **BACKING**: Foam 0.8 mm
- **ADHESIVE**: Acrylic solvent based
- **COLOUR**: Black (green LDPE liner)
- **TOTAL THICKNESS**: 0.850 mm
- **ADHESION**
  - Ext: 14 N/25mm
  - Int: 14 N/25mm
  - TENSILE STRENGTH: 24 N/25mm
- **ELONGATION TO BREAK**: 220 %
- **TEMPERATURE RESISTANCE**: 90 °C

**Long term foam**
Double sided black foam tape to mount plates, emblems and profiles in the automotive sector. High adhesion. Excellent resistance to UV, weather conditions and ageing. High elongation and conformability.
### WHITE FOAM 1.5
Fixing, mounting and fastening

<table>
<thead>
<tr>

**Over laminate tape**
Single sided tape with a BOPP film used to over-laminate onto self-adhesive labels, non adhesive labels and posters.
**SF 7220 TIP TAPE**
Temporary protection

- **BACKING**: Laminated foam
- **ADHESIVE**: Acrylic water based
- **COLOUR**: White
- **TOTAL THICKNESS**: 1.600 mm
- **ADHESION**: 3 N/25mm
- **TENSILE STRENGTH**: 55 N/25mm
- **ELONGATION TO BREAK**: 75%
- **TEMPERATURE RESISTANCE**: 60 °C

*Thicker protection foam, medium adhesion*
High protection of glass, varnished wood, plastics, ceramics in the furniture industry, ship building and glass manufacturing areas. Acts as a double protection, during manufacturing (against dust), but also during transport (against shocks).

---

**6110**
Sterilization process indicators

- **BACKING**: Saturated paper
- **ADHESIVE**: Natural rubber
- **COLOUR**: White (Green ink)
- **TOTAL THICKNESS**: 0.120 mm
- **ADHESION**: 6.5 N/25mm
- **TENSILE STRENGTH**: 85 N/25mm
- **ELONGATION TO BREAK**: 4.5%
- **TEMPERATURE RESISTANCE**: ¬

*Steam sterilization*
Lead free process indicator tape designed for steam sterilization systems. The colour print changes from light green to medium/dark green as proof of exposure to a saturated steam sterilization cycle. Complies with EN ISO 11140-1:2014 Type 1 e1 standard.

---

**6130 TT**
Sterilization process indicators

- **BACKING**: Saturated paper
- **ADHESIVE**: Natural rubber
- **COLOUR**: White
- **TOTAL THICKNESS**: 0.135 mm
- **ADHESION**: 4 N/25mm
- **TENSILE STRENGTH**: 100 N/25mm
- **ELONGATION TO BREAK**: 7%
- **TEMPERATURE RESISTANCE**: ¬

*Steam sterilization without indicator*
Single sided steam sterilization tape without indicator; no visible evidence that the tape has been through the sterilization cycle.

---

**SOFT PVC FINE LINE**
Car refinishing and repairing

- **BACKING**: Soft PVC
- **ADHESIVE**: Natural rubber
- **COLOUR**: Yellow
- **TOTAL THICKNESS**: 0.150 mm
- **ADHESION**: 6 N/25 mm
- **TENSILE STRENGTH**: 70 N/25 mm
- **ELONGATION TO BREAK**: 150%
- **TEMPERATURE RESISTANCE**: 60°C

*Fine line soft PVC tape*
Soft PVC fine line tape is used when painting long straight lines and sweeping curves where a sharp paint line is desired. Suitable even as a layout tape for multi-color and custom painted graphics.
### SOFT PVC FLOOR MARKING

**Decoration and building**

**White and red barrier tape**

Non adhesive LDPE tape widely use for traffic guide, corporate branding, promotional purpose, crowd control, isolate a specific area and warning security control.

### DISPENSER

Table dispenser to be used with an adhesive tape max width 19 mm and 1” - 3” cores. Easy to use and available in several colours.

Hand dispenser used to close boxes with adhesive tapes 48mm wide and 3” core. Suitable also for industrial applications.
**Stationery Tapes**

**ACR-43**  
Home, school and office  
![ACR-43 Tape](image)  
**Description:** Transparent tape for office and school  
Single sided tape designed for all small jobs at school, at home, in the office. Easy to use, on a dispenser or by hand. High adhesion.

</tbody>
</table>
An adhesive tape is a strip of material with adhesive properties, which means that with gentle pressure it can stick to different surfaces at normal temperature. The tape does not need heat, wetting, or any other element but only simple pressure for its adhesion to a surface.

**TWO TYPOLOGIES OF TAPE**

There are *single-sided* and *double-sided* tapes:

- **Single-sided tape**: the adhesive is applied only on one side of the film or backing.

- **Double-sided tape**: the adhesive is applied on both sides of the backing and, unlike single-sided tape, it includes a third layer: the liner. The liner is usually made of bi-siliconed paper but it can also come in a different material.

**TAPE STRUCTURE**

Most self-adhesive tapes are made combining one backing and one adhesive.

**BACKING**

The materials used as backing are relatively thin and flexible, perfect to be coated with adhesive.

**Paper**: with smooth or creped surface. Most of the paper typically used for tapes are enhanced through saturation, a process where synthetic latex is used to saturate the paper, thus modifying its mechanical and physical characteristics.
**what is an adhesive tape?**

**Plastic films:** Polyvinyl chloride (PVC), Polypropylene (non-oriented PP, mono-oriented MOPP and biaxially oriented BOPP), Polyethylene (usually LDPE), Polyester (PETP, commonly known as PET).

**Cloth:** in cotton, polyester or fiberglass.

**Foams:** thick backing, the most common are in Polyethylene.

**Non-Woven fabric:** made of textile fibres; very conformable, it can be easily torn by hand.

**Laminated backing:** combination of two or more materials (i.e. foam+film). This process helps enhance the features of a product by combining the main characteristics of the materials assembled together.

**ADHESIVE**

**Hot melt adhesive (synthetic rubber base):** produced by heat melting and mixing of synthetic resins and thermoplastic rubbers, without solvents.

**Solvent-based adhesive (natural rubber base):** made with natural rubbers and resins dissolved in solvent which is later recovered during coating in special drying ovens and reused for new productions.

**Water-based acrylic adhesives:** adhesives obtained by acrylic polymers in water dispersion, which evaporates during coating.

**Solvent-based acrylic adhesive:** acrylic polymers are dissolved in solvents, then extracted in proper ovens during coating.

Other components may be used during manufacture of self-adhesive tapes: the release is an anti-adhesive material applied on the uncoated side of single-sided tapes (the “back”) and makes unwinding easier; the primer, improves anchorage; it improves bond between adhesive and backing.

**SICAD TAPES MANUFACTURING**

Sicad Group’s know-how includes the most advanced and unique technologies available (hot-melt, solvent, water dispersion) and the ability to produce and coat adhesives with:

- ☑️ synthetic rubber base
- ☑️ acrylic base
- ☑️ natural rubber base
- ☑️ siliconized base
- ☑️ paper saturation
- ☑️ BOPP films extrusion
- ☑️ backing lamination
- ☑️ flexographic printing
- ☑️ paper core production

The manufacturing process includes the production lines for:

- 🔨 paper saturation
- 🔨 BOPP films extrusion
- 🔨 backing lamination
- 🔨 flexographic printing
- 🔨 paper core production

The mother rolls (jumbo rolls) of the tapes manufactured are processed through highly-automated lines, using blade slitting, pressure cutting, scissor-type cutting and lathe.
**HOW TO CHOOSE A SELF-ADHESIVE TAPE**

Although self-adhesive tapes can be applied on almost any material, it is always advisable to verify the application parameters and conditions of use before choosing the tape.

*Application surface*

Although self-adhesive tapes are usually compatible with most materials and application surfaces, some materials have anti-adhesive properties or low compatibility with the chemical composition of certain adhesives. In some cases, adhesion may be affected by the excessive interaction between adhesive and material/surface. For this reason, carrying out a compatibility test is fundamental.

*CONDITION OF USE*

Best temperature for the application ranges from 15°C to 25°C in a dry environment; it is preferable not to apply the tape when the temperature is below 50°C. Please note that if the temperature varies substantially from the recommended temperature, adhesives may react differently, depending on their chemical characteristics and/or composition.

For best results please consider these practical suggestions:

- Application surfaces must be dry and free from dust;
- Do not apply on surfaces treated with or contaminated by anti-adhesives;
- Do not use paints containing additives which could reduce the adhesive properties;
- Application surfaces must be free from plasticizers or other chemical agents incompatible with the tape;
- Smooth surfaces increase adhesion;
- In case of rough or irregular surfaces, please use tapes with a higher quantity of adhesive;
- Important data to be evaluated are “working” conditions and potential removability of the tape without residues.

*STORAGE*

Suggested storage temperature ranges from 15°C to 25°C with maximum relative humidity of 65%. The material must be stored away from heat sources, possibly kept in its original package avoiding direct exposure to sunlight. When the storage temperature is below 10°C, room temperature reconditioning of the tape before use is always recommended.

*TAPE SHELF LIFE*

Generally, self adhesive tapes’ technical features remain at their best for a minimum of 12 months. It is up to the manufacturer to specify other different life time.
